

PROPOSAL

Proposal Prepared for:

Western District School Board

Stevenson Elementary School
122 Barlow Drive
Dog River, Ontario

Capacitance Proposal

DD/MM/YYYY

We are pleased to submit our proposal to complete a nondestructive capacitance test at your facility. We extend this submission and all information contained herein for your evaluation, feedback and recommendations for further refinement.

Maintaining a flat or low-sloped insulated roof is an expensive and complicated challenge building managers and owners face every day. Capacitance nondestructive testing on roofs provides invaluable insights to building managers by identifying moisture trapped within the roofing system. Rather than performing expensive roof wide repairs, armed with moisture survey results, building managers can institute targeted and less costly corrective actions. Our vision, over time, is to develop an innovative and flexible roof management partnership that will allow your company to be relieved of the traditional qualitative and financial uncertainties associated with a complex roofing inventory. As a partner, Tremco proposes to deliver customized roof management solutions to achieve budget stability and high performance over the long term.

We recognize the importance of delivering roof services and projects in a professional, timely, cost effective and efficient manner. We are confident that WTC's qualifications, experience of team members, and management approach will yield long term beneficial results. We plan to deliver outstanding service using quality processes, proven methodologies and a team-oriented approach.

Sincerely,

Dave Mundy
Senior Field Advisor

Capacitance Proposal

Service Includes

The following are the parameters for the completion of the Thermographic Roof Inspection

- Scan of entire roof assembly
- Verification of moisture areas with a moisture meter
- Areas of moisture marked directly onto the roof
- Scaled Roof Plan identifying all wet areas
- Roof composition for each roof assembly
- Report illustrating photos and moisture documentation
